DATE MAILED: 11/01/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/991,164

Applicant(s)

WEAST, JOHN C.

Examiner

Tse Chen

Art Unit

2116

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 31 August 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-42 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☐ Claim(s) _____ is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☒ Claim(s) 1-42 are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Election/Restrictions

- I. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10, 27-30, and 38, drawn to a method and medium embodying information for performing the method comprising “receiving a request to perform a write operation to a file system device... determining whether the device is operating in a limited power state prior to determining whether the device is activated or inactivated... detecting an input request that the write buffer contents be committed to non-volatile storage... determining whether the requested write operation corresponds to an entity registered to participate in the method of controlling device write operations... wherein buffering the write operation to physical memory comprises deleting from physical memory a prior buffered write operation request the seeks to modify a same storage location on the device as the write operation to be buffered...”, classified in class 713, subclass 340.
 - II. Claims 11-23 and 31-37, drawn to a method and medium embodying information for performing the method comprising “receiving a request from a process to read a portion of a file from a device... accessing the device to read a superset of the requested file portion into memory, wherein the superset of the requested file portion is logically related to the requested portion... determining whether the requested read operation corresponds to a file type registered to participate in the

Art Unit: 2116

method of controlling device read operations...”, classified in class 713, subclass 300.

- III. Claims 24-26, drawn to a system comprising “... detecting that a time-out period is to expire for deactivating a non-volatile storage device that provides access to data... if a limited power condition is determined to exist, writing one or more buffered write operations from physical memory to the non-volatile storage device before the non-volatile storage device is deactivated...”, classified in class 713, subclass 330.
- IV. Claims 39-42, drawn to a system comprising “... an intermediate file system driver to receive user customized parameters... to provide read/write policy to the file system driver based on the user customized parameters... wherein the read/write policy is to minimize at least one of (a) unnecessary device access operations and (b) unnecessary device activation-deactivation operations... wherein an application executing on the processor registers with the intermediate file system driver to indicate compliance with selective buffering techniques to be used in conjunction with the read/write policy...”, classified in class 713, subclass 310.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as performing read requests based on supersets. See MPEP § 806.05(d).

3. Inventions I and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus/system as claimed in invention III can be used to practice another and materially different process such as controlling file system access based on timeout parameters.

4. Inventions I and IV are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus/system as claimed in invention IV can be used to practice another and materially different process such as controlling file system access via an intermediate file system driver for receiving user customized parameters to implement specific read/write policy.

5. Inventions II and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus/system as claimed in invention III can be used to practice another and materially different process such as controlling file system access based on timeout parameters.

6. Inventions II and IV are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice

Art Unit: 2116

another and materially different process. (MPEP § 806.05(e)). In this case the apparatus/system as claimed in invention IV can be used to practice another and materially different process such as controlling file system access via an intermediate file system driver for receiving user customized parameters to implement specific read/write policy.

7. Inventions III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention IV has separate utility such as controlling file system access via an intermediate file system driver for receiving user customized parameters to implement specific read/write policy wherein an application executing on the processor registers with the intermediate file system driver to indicate compliance with selective buffering techniques to be used in conjunction with the read/write policy. See MPEP § 806.05(d).

8. Because these inventions are distinct for the reasons given above and the search required for each group is different, restriction for examination purposes as indicated is proper.

9. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

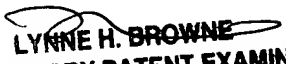

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tse Chen whose telephone number is (571) 272-3672. The examiner can normally be reached on Monday - Friday 9AM - 5PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lynne Browne can be reached on (571) 272-3670. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
